

# X55B AUTOMATIC ONE STEP CLEAVER

with Auto Blade Rotation & Auto Scrap Collector

## FEATURES:

- One step - Easy to use design
- Automatically rotates blade and collects fiber scraps
- The cleaver body is made of high quality aircraft hard aluminium, CNC machined, high precision, no deformation
- Average cutting angle of less than 0.5°
- Blade made of vonfram steel, high durability
- Multifunction fixture: tight & loose buffer fiber (250um, 900um), fiber patchcord (1.6mm, 2.0mm, 3.0mm), drop cable (2x3mm)...
- Carrying case: Hard plastic material, metal rotating shaft

## SPECIFICATIONS

|                        |                                                         |
|------------------------|---------------------------------------------------------|
| Bare fiber diameter    | 125μm                                                   |
| Coating diameter       | 0.25mm~0.9mm                                            |
| Fiber type             | Single core fiber, Silica glass                         |
| Cleaved length         | 5 ~ 16mm                                                |
| Cleaved angle          | 0.5°                                                    |
| Blade life             | 60000 times (24 positions)                              |
| Mode                   | Automatic                                               |
| Dimension              | 103mm(W)×93mm(D)×90mm(H)                                |
| Weight                 | 340g                                                    |
| On/off switch          | Yes, when using/not using fiber cleaver                 |
| Package                | Fiber Cleaver with Dustibin, User Manual, Carrying Case |
| Opertation Temperature | -10°C~+50°C                                             |
